NEW-BRUNSWICK ALDERMAN ARRESTED.

THE LATEST PHASE OF A LIVELY SALGON WAR. New-Brunswick, N. J., Dec. 11 (Special).-Alderman Joseph Miller, chairman of the Excise Com-mittee of the New-Brunswick Board of Aldermen and proprietor of the Park House, in Commercial-ave., was arrested to-day by Chief of Police Harding on the charge of keeping a disorderly house, be cause he was selling liquor at wholesale with only a retail license. David McCloskey, recently ar-

rested for selling without a proper bottler's license, was the complainant. Miller gave bonds to appear before the Grand Jury.

Two other saloon-keepers were arrested on Monday. All the arrests are made under a resolution recently passed by the Common Council and introduced by Alderman Miller himself.

It is said that the Werts law, which is strict in its provisions, forbids the selling at retail in any quantities less than a quart unless the liquor is drunk on the premises. If this is so, Chief of Police Harding is of the opinion that every saloon-keeper in town continually violates the law in selling a pint.

Notwithstanding the confidence of the Commissioners, saloonkeepers generally expect to see a "dry Sunday" in Newark hereafter. Smith, attorney for the railway company, that a majority of the consents of property-owners for a trolley road had been secured. He suggested to the Council that it would be a good idea to appoint two citizens in favor of the ordinance and two opposed to it to find out just who have signed and who have not. The hearing was adjourned to Monday afternoon, December 30, when the franchise will probably be granted.

Mayor Fagan recently announced that he will veto the franchise, but the supporters of the railway say it will be passed over his veto.

HIS SENSATIONAL TESTIMONY DENIED BY HIS FATHER.

STOCK IN THE LIGHTING COMPANY.

THE CAMDEN INVESTIGATION PUTS THE ACCUSED · ADAPTED FOR CITY OFFICIALS ON THEIR METTLE-ONE EX-OPEN FIREPLACES,

> Camden, N. J., Dec. 11 (Special).-John L. Balley, sho last week swore that stock of the Camden Lighting and Heating Company went to certain mbers of the City Council in consideration of the valuable electric lighting contract with the city, was subjected to a scorching cross-examination to Not only were his statements positively denied by officials of the company and by the Councilgen involved, but his own father gave the lie direct to young Bailey's assertions. He was on the stand the greater part of the day, and his first move was to recall the most important feature of the testibegan his testimony that he was unable to fix the date of the transfer of stock by his father Councilman Rex "in trust," and he would like all that part of his testimony relating to the time of the transfer to be stricken out. decided that this should not be done. Mr. Bleakley, counsel, wanted to question the witness in regard to tax money paid by his father, William T. Bailey, to City Counsel J. Willard Morgan, but the

sioners decided that this should be deferred until Mr. Morgan's return to the city. Ex-Judge Armstrong, president of and counse for the Camden Lighting and Heating Company then took the witness in hand and subjected him to a rigid examination. Bailey told of his employ ment by the company as a clerk, and of the fre eetings of the Board of Directors at No Market-st. He thought it was in the spring of 1887 or 1888 that the meetings were held. It was before the company secured a contract for lighting the Mr. Armstrong, the witness said, preside some of these meetings. At one there was a state ment that a Councilman had "jumped the traces,"

and it was left to Mr. Armstrong to see hi ANOTHER COUNCILMAN INVOLVED. Who was this Councilman who was said to have jumped the traces?" asked ex-Judge Armstrong. "Harry Moffett," was the prompt reply.

"Was this before the municipal lighting contracwas awarded?"

After vainly endeavoring to get the witness to fix definitely the time of this and other meetings when the city contract was under discussion, ex-Judge Armstrong said he would like to call witnesses on behalf of the company he represented, but the Commissioners ruled out such testimony.

of the leading attorneys of the city and counsel for the officials under investigation, got hold of Balley he winced. Mr. Rex at once began to ques m as to the alleged transfer of stock Bailey said the stock was the rolling-top desk of his father, treasurer of the Camden Lighting and Heating company. He had seen it prior to that time in

of Perpetual Help (New-York). I take it, was to the effect that for the future the priests of that church would not give the sacraments of baptism and matrimony (and the last sacraments to dying Catholics) to Catholics not Rohemians, unless they had a seat or pew in the church. The reason is that if they have not a seat or pew in their church they are not their parishioners and can receive those sacraments only from their own parish priest. This rule, however, applies to cases in general where there is great urgency, as, for instance, where a Catholic is dying and there is danger that his pastor will not arrive in time, any priest may and will give him the last sacraments."

The Church of Our Lady of Perpetual Heip, New-York, in which the notice was published, occupies an unusual position in that it has no parish lines or limits. It was founded by the Redemptorist Fathers as a mission for Bohemians. The church is within and it encroaches upon the territory of St. Vincent Ferrer's Church, at Lexington-ave, and Sixty-sixth-st., and the Church of St. John the Evangelist, at First-ave, and Fifty-fifth-st.

Many English-speaking persons have recently attended to the support. Whose name was on the stock?" asked Re-"I did not notice," replied the witness He said he knew it was the Lighting Company's because he was familiar with the color and form of that stock. The witness could not tell the num-ber of the stock certificates, the amount, or the name in which it was issued, but he saw it handed to Mr. Rex

To Mr. Rex.

Following this admission Rex started in on a sensational line of cross-examination tending to show that the witness. Bailey, had tried to extort money from members of the Camden Lighting and Heating Company, and had received money from the Camden Gas Light Company. Bailey admitted that he had gone to the office of ex-Sheriff Baird and told him he was subpoenaed to appear in the investigation, and spoke about his testimony. Mr. Baird, he said, told him to go before the Commission and tell the truth; that he (Baird) had paid for his stock in the lighting company, and had nothing to conceal. In answer to specific questions, Bailey denied that he had intimated to ex-Sheriff Baird that if he received money he would go away and not testify. He also denied that he met Frank Kirkbride after the visit to Baird's office and said if he did not get \$500 he would tell all he knew. He said he called en City Counsel Morgan, but denied that he intimated to him that if he had sufficient mo ney he would go away.

Ex-Councilman William B. Dorrell was then called. He was chairman of the Lighting Committee of the City Council in 1888, when the first mittee of the City Council in 1888, when the first lighting contract was awarded to the Camden Lighting and Heating Company, but he never got any stock, as Ba'ley had testified. After the contract was awarded he saw William T. Bailey, the treasurer of the company, and asked about some stock, but Mr. Bailey referred him to Mr. Rex. He said, too, that he had seen the mysterious Mr. Mullen, who was apparently the promoter of the enterprise, and "he said he thought I ought to have some of the stock, and that I was entitled to it."

Mr. Rex took the oath as witness and swore that, to the best of his recollection, he was never in the office of William T. Bailey while he was treasurer of the electric company; he never received any stock from him, either for himself or in trust for others, and that he knew absolutely nothing about any stock going to any member of the City Council, but that he had purchased it outright and had transferred it to E. N. Cohn in liquidation of a debt before he had anything at all to do with the award of the contract.

The most pitlable exhibition was that furnished by ex-Postmaster William T. Bailey, who absolutely repudiated the testimony of his son, and occlared pathetically that he had never handed Mr. Rex or any other consideration at any time or under any circumstances.

MUNICIPAL OWNERSHIP IN CAPE MAY. Cape May, Dec. 11 (Special).-The City Council has ordered a special election to be held on December 24 to vote on raising the limit of the city's debt \$50,000. The money, if granted, will be used for a new boardwalk on the ocean front, and an electric lighting plant to be owned and controlled by the city. The water plant which the city owns is valued at a greater amount than the whole municipal debt, and because of the successful experiment with it the authorities are seeking to own all public fran-chises.

THE LONG BRANCH ELECTION. OPPONENTS OF THE TROLLEY WIN EASILY-A SUPPOSED CASE OF BALLOT-BOX

STUFFING FALLS FLAT. Long Branch, Dec. 11 (Special).-Yesterday's municipal election in Long Branch resulted in a victory for the Citizens' ticket, headed by Mayor Rufus Blodgett, who opposes the trolley. Mr. Blodgett's ticket, beat Thomas W. Cooper by 252 majority, and

ticket, beat Thomas W. Cooper by 252 majority, and C. Asa Francis, on the Citizens' ticket, led William R. Warwick by 277.

The Ward Commissioners elected are J. E. Mulholiand in the First by 141 majority; Thomas Meckanna in the Sectond over Edward Hughes by 39 majority; E. C. Burt in the Third by 36 majority over Jerome F. Davis, and Walter G. Reed by 47 over Jerome F. Davis, and Walter G. Reed by 47 over Jerome F. S. S. Soobey. The election was quiet, although a large vote was polled. The highest man on the ticket was C. Asa Francis, who had 858 votes. In counting the ballots cast in the Second Ward thirteen more names were discovered on the taily sheet than there were ballots in the box. Charges of ballot-box stuffing were made, and the ward watchers became excited, but on examining the taily sheet thirteen numbers were found to have been skinced by the clerk. Polyert Hamilton which wateriers became excited, but on examining the tally sheet thirteen numbers were found to have been skipped by the clerk, Robert Hamilton, which accounted for the missing ballots. Charges of the same kind were made at the primaries held here last week, but they were disproved on the recount.

THE CHIEF IS OFFENDED. HE THINKS JUDGE LIPPINCOTT WAS TOO HARSH

Chief of Police Murphy, of Jersey City, is offended

at the manner in which his department was scored by Justice Lippincott in his charge to the Grand Jury. The Chief says that the criticism, so far as he knows, is unwarranted. The police are siways ready and willing to do their duty, and opposed to the licensing of concert halls. He is not aware, he says, of the existence of any disorderly resorts, and if the Court had information on which it based its renarks about gambling and concert halls, and that information had been sent to the police, it would yould do their duty or not. The Chief says there is any policy playing it is quietly done and almost impossible to detect. He had the gambling law amended so as to restrict, if not prevent, policy playing. Under the act he had passed, he says, a person found with a play or slip on his person can be sent to State Prison, and one year is the mini-mum penalty.

WILL CURE CONSUMPTION.

Cod-liver oil, cough mixtures and change of climate used to be the stereotyped treatment for all consumptive cases, and under it the disease was so invariably fatal that it came to be regarded as incurable. And it cannot be doubted that physicians rather encouraged the belief in its incurability, because their ministrations always resulted in failure.

The thought that consumption could be cured by air alone was one of the oldest delusions of its treatment. It has been persistently tried for centuries, in every climate of the globe, and invariably terminated in disappointment. We now know that consumption is a germ

warlably terminated in disappointment.

We now know that consumption is a germ disease of the lungs common among the natives of all lands. It is a little less common in warm than cold countries because in the latter congestions of the lungs are more prevalent. The difference, however, is very slight—only a fraction of 1 per cent. Those therefore who go to warm countries with the disease are no better off than natives of such countries who have consumption contracted in that climate. As the latter get consumption and die of it despite the climate it is folly to suppose Northern patients would be cured by going to it. Change of air is always beneficial to the general health, because it is helpful to the appetite, digestion and strength of the patient temporarily, but the benefit is only general and in no sense curative of the lung disease. As no natural air can kill the germs in the lungs or heal the wounds they have inflicted, no climate in the wide world will ever cure consumption. California, Texas, Colorado, Florida and the Adirondacks in this country, and Nice, Naples, Villa Franca, Egypt, Algiers and Maderia in the old world, have all been tried in vain. The gravyards of those countries attest the failure of their climate to cure the disease. It is a cruel deception to pretend that living parasites, which are devouring the tubes and cells of the lungs—as moths feed upon wools and furs—can be destroyed and expelled by any natural atmosphere in the world. No other germ disease of the body was ever cured by air alone and all medical experience goes to prove that the perms of consumption cannot be got rid of by any change of climate.

Do not, however, imagine from this that I am opposed to change of climate or do not regard open air as necessary to a proper treatment of The are in the life of the lungs. "God

n air as necessary to a proper treatmounts. The air is the life of the lungs. the lungs. The air is the life of the lungs. "God breathed into his nostrils and man became a liv-ing soul." Air is the natural purifier of the blood, and the element which assimilates and makes new blood out of the foods eaten, and is makes new blood out of the foods caten, and is therefore necessary to health, just as good food, proper clothing and regular exercise are neces-sary. Wherever they can be best obtained with the least exposure to injury is the the sick. But what I wish to imbest place for the sick. But what I wish to impress upon all is that no climate in the world will kill the germs of consumption or save from death those afflicted with lung disease. This can be done only by inhaling germ-destroying medicines into the lungs. Such germicides discovered by me I am now applying with great success in all forms of lung disease. It is only by medicating the air that it can be made healing and curative of lung complaints. The germs in the lungs are the source of all the danger to the patient. If they are not reached and expelled they destroy the very citadel of life. medicating the air that it can be made nearly and curative of lung complaints. The germs in the lungs are the source of all the danger to the patient. If they are not reached and expelled they destroy the very citadel of life. They cannot be reached by anything taken by the stomach, nor by any hypodermic injection through the skin. The germicides must be inhaled and brought into actual contact with the germs in the tubes and cells of the lungs or no cure will result. That is why I say that my treatment by inhaled germicides is the only course that can possibly arrest and cure consumption.

MURDER MYSTERY NEAR WASHINGTON A BODY EXHUMED AND FOUND TO BE THAT OF MISS ROSS, OF BELVIDERE.

Washington, N. J., Dec. 11 (Special).-The body of the woman found dead on Marble Hill, near Philipsburg, on November 28, was exhumed and fully identified by relatives as that of Miss Susan Ross, of Belvidere. Miss Ross, who was seventy-five years old, boarded in Belvidere, and was known to have considerable money. On November 26 she went away from home with over \$100 upon her person. She was seen in Easton the same day and made a number of small purchases. Then she started for the home of relatives in Harmony, three miles away. When the body was found by some hunters two days later, there was no money upon it. The Coroner's jury rendered a verdict that the woman came to her death from natural causes, and after holding the body for identification for over a week the Coroner had it buried.

From photographs the relatives of Miss Ross identified the body, and it was positively identified upon Miss Ross, who was seventy-five years

From photographs the relatives of Miss Ross identified the body, and it was positively identified upon being exhumed this morning. There is every evidence that foul play was committed, aithough no injuries were visible upon the dead woman.

The Coroner's jury is severely criticised for bringing in such an incomplete and careless verilet. The affair will be thoroughly investigated.

THIS CAT HAD A LONG RIDE.

About a week ago a kitten wandered into the power-house of the electric railroad near Milltown, N. J. The engineer fed the kitten, and it became a N. J. The engineer fed the kitten, and it became a faxture in the house. A few days later she was attacked with a fit and began to race about. Suddenly she disappeared. Eight hours later, when the power was shut off and the engines stopped, her body dropped from the great flywheel. In her fit she had evidently run into the wheel, and after that had been carried round and round in the eighteen-foot wheel for eight hours. The wheel makes eighteen revolutions a minute, and the kitten must have travelled almost 475 miles during the time she was in the wheel.

WAR ON A LAMBERTVILLE CLUB. Lambertville, Dec. 11.-The Grand Jury here is investigating a local club, which is alleged to have been systematically violating the excise laws. It is was not a license granted in the town, and the club was started. Throughout the year it did a thriving business. So far as the records show no license has ever been granted to the club, even as a club,

and the authorities expect to convict the leaders, even if they do not fasten the guilt upon the man they appear to be after. RESULT OF THE INVESTIGATION A SECRET The Newark Common Council committee to investigate the purchase of a site for a disinfecting statestimony in the case, met yesterday afternoon and held a private session to make up the report to the

Council. The committee would say nothing about their conclusions. Two offers to buy the property, which cost \$15,000, were sent in—one for the same amount and one for \$16,000. BERDINE ASSAULT CASES ADJOURNED.

New-Brunswick, Dec. 11 (Special).—The cases of George Berdine against John Daly and Harry and Robert Ross, sons of ex-Congressman Miles Ross, for atrocious assault and battery, which were set down for trial at the present term of the Middlesex County Court, were marked off the term to-day by Chief Justice Beasley. The cases were adjourned at the request of the plaintiff, who produced an affidavit that Dr. Henry R. Baldwin and ex-Judge affidavit that Dr. Henry R. Baldwin and ex.Judga Charles T. Cowenhoven, material witnesses, could not be present. Dr. Baldwin is on a shooting trip in the South and Mr. Cowenhoven is confined to his nome from illness. Ex-Senator Abraham V. Schenck, counsel for the defendants, strongly opposed the application. The Ross boys assaulted Berdine, who is a prominent Republican lawyer, one night on the public street, because Berdine would not apologize to their father for remarks made about him at a political meeting. The suits are each for \$10,000 damages.
